

## TURF ORDERING FORM

### What You Need To Know

Before ordering, you should have the following information to ensure your order is accurate.

1. What is the total square footage of the area where the turf is being installed?
2. Ground prep is the most important part, depending on your soil you can either add amendment such as humus, or build your ground up with triple mix.
3. Ground prep needs to be completed before receiving sod.
4. Be aware of aftercare such as new watering instructions. Watering times vary on time of year; ask our staff for more details.
5. Is your sprinkler system installed and ready?
6. You will need a starter fertilizer to go down with your new sod. Our [overview video](#) is a great place to start.
7. Sod needs to be installed within 24 hours of receiving. If the outside temperature is above 90 degrees, it will need to be installed immediately.
8. *Make sure not to over order. Perishable items are nonrefundable.*
