

SPECIFY – OASIS BLUE FESCUE

We source the seeds for our sod blends from Landmark Turf and Native Seed, an industry-leading provider and member of the Alliance for Low Input Sustainable Turf (A-LIST), a national organization that promotes successful and sustainable grass growth. Below, you'll find our current mixes that make up our Oasis Blue Fescue.

OASIS BLUE FESCUE

- ✓ High leaf density
- ✓ Outstanding drought tolerance
- ✓ Quick divot recovery
- ✓ Excellent dark green color with early spring green up

RATINGS

(10 BEING BEST)

90% FESCUE 10% BLUE GRASS

The finer, denser texture of Oasis Blue Fescue provides better mobility and ball play on athletic fields and its beneficial rhizomes allow for quick fill-in and repair both in high traffic areas and low maintenance areas.

This is a high-heat, drought-tolerant, brown patch-resistant, medium blade grass that excels in areas of full sun and heavy traffic. The fast recovery and ability to retain its color into the winter months makes this an ideal grass for sports fields in our warmer zones, parks, or home lawns – particularly for those with large dogs.
