

# SPECIFY – WESTERN BLUE DERBY

We source the seeds for our sod blends from Landmark Turf and Native Seed, an industry-leading provider and member of the Alliance for Low Input Sustainable Turf (A-LIST), a national organization that promotes successful and sustainable grass growth. Below, you'll find our current mixes that make up our Western Blue Derby.

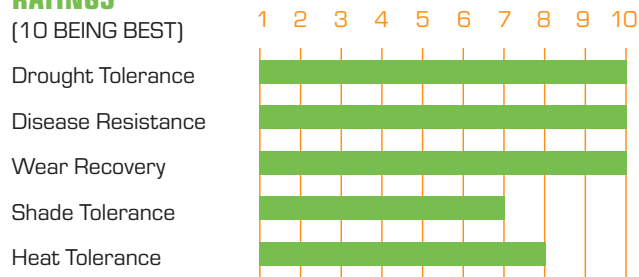

## WESTERN BLUE DERBY

- ✓ Excellent in high traffic areas and athletic fields
- ✓ Quick recovery
- ✓ Excellent disease resistance
- ✓ Prefers full sun
- ✓ Tolerates mowing height of 1/2" - 3/4"

### RATINGS

(10 BEING BEST)

## 80% BLUE GRASS

## 20% RYE

A blend of Midnight Kentucky, Lunar Kentucky, Shannon Kentucky, and Fullback Kentucky Bluegrasses mixed with a blend of Intense, Spark, and Accelerator Perennial Ryegrasses.

Our Western Blue Derby makes for a finer, softer leaf blade with a beautiful darker green color. Its strong root system adapts to many different soil types allowing for fast recovery from high traffic. It thrives in hot and cool temperatures while tolerating a variety of mowing heights. And its low water use is why you'll find this grass commonly used in not just home lawns, but parks, professionally landscaped common areas, and sports fields in our cooler zones.
